

Introducing TruAudio: Not your run-of-the-mill speaker company.

Simply put, we're the speaker manufacturer we wanted back when we were installers. If TruAudio was around back then, we might still be installing today. We owned a custom installation company for about 10 years but founded TruAudio because we saw the need. By pulling wire and installing systems for that long we discovered many things an engineer would never think of.

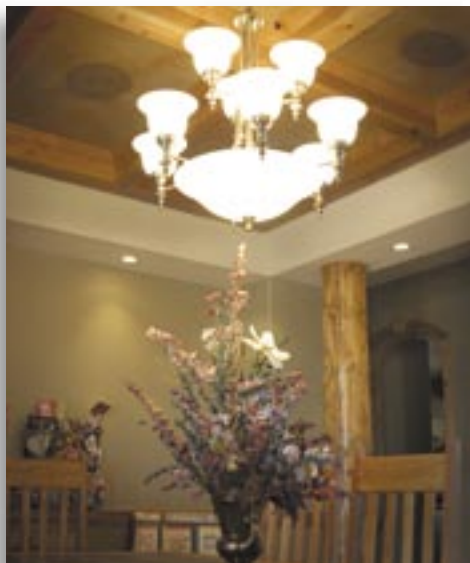

As installers we gained valuable experience, which has enabled us to develop a complete line of architectural speakers specifically for the custom market. When we develop new product lines we ask our dealers for recommendations. Because of this insight our products are easier to sell and quick to install.

Loyalty to our dealers tops the list. This is something we built our company around, everything from setting up limited certified dealers in an area to our lifetime warranty. We know that if we are 100% loyal to you then we can earn the same loyalty back.

Our products are only sold through certified dealers. We will NEVER sell through retail, distribution or over the Internet. You can feel confident that not just anyone will be out selling TruAudio. We promise you that.

Our customer service is outstanding, truly a cornerstone of TruAudio! We make sure our dealers are treated like gold. We always ship out the same day and do all we can to keep the product in stock. If you do end up having a problem we will take care of it immediately. We do all we can to keep you and your customer satisfied.

The bottom line is that TruAudio is a speaker manufacturing company built by custom installers. We know what you want out of a speaker and what you need to sell to the consumer. When you buy TruAudio, you get a superior speaker that is designed for the custom installer by the custom installer.

**A sound investment
for any project**

■
**Surprisingly dynamic
performance**

■
**Guaranteed quality
that's built to last**
